2.0 PRO[®] Gutter Guard is one of the best performing micro-mesh gutter guard on the market today. In most cases, rainfall and wind is sufficient to keep it clean, but there may be some instances where cleaning/maintenance will be required by the homeowner. Light winds should remove most surface debris, but if debris is wet or compressed, higher winds may be required to effect shedding. Homeowner maintenance may be needed from time to time to remove debris off of troubled areas, and we recommend occasional homeowner maintenance of the gutter guard for those areas.
